

Portable Outlets/ Couplers

Portable outlets (Also referred to as couplers) are used in cases where the existing medical gas infrastructure does not fully answer the medical facility needs. These cases include: extension hose assembly for ceiling gas outlets, adapters between different medical gas outlet standards, outlet Y fitting and for portable pressure regulators.

Silbermann manufactures the following probe types: Diamond, DISS, ENV 737-6 & DIN 13260-2, and British standard. All couplers are with 1/4" NPT connection.

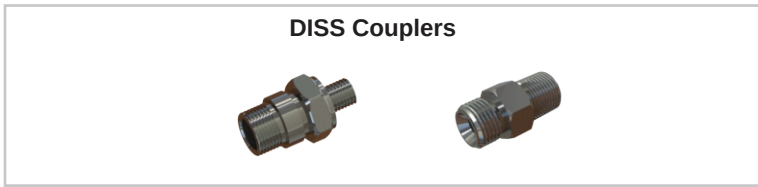

Gas Type	Cat No.
Oxygen	3069300
Nitrous Oxide	3070300
Vacuum	3072300
Medical Air (Yellow)	3071305Y
Medical Air (Black)	3071305
